

# ADDENDUM #2

**To:** Prospective Consultants

**From:** Gary Williams

**Date:** May 20, 2025

---

**SCOPE:** This Addendum #2 seeks to provide clarification regarding “Request for Qualifications – Feasibility Study for Solar Development” published on 4/30/2025. Consultants that respond to this RFQ should acknowledge that this addendum has been reviewed.

## Q & A:

1. On page 7, Please confirm that “Consultant Deliverables” is only required for firm awarded with this RFQ, and not required in proposal submittals.

*Yes, the “Consultant Deliverables” section was added to let prospective firms know what may be included in the feasibility study that will be completed later. Respondents to this RFQ are not required to provide anything related to the “Consultant Deliverables” section.*

2. On page 3, under “Fee Proposal”, this area mentions that RLCD will not be evaluating proposed fees. Should firms responding to the RFQ submit their fee in the proposal?

*As stated in the RFQ, the RLCD is evaluating proposals to this RFQ in the hope of identifying a consultant that can perform a future feasibility study for possible solar development at various properties. As such, and consistent with qualifications-based selection (QBS) processes, the RLCD will not be using proposed fees as an evaluation criteria. As such, we ask that respondents not include proposed fees or fee schedules in their responses.*
